June 2010

AMP Capital Equity Fund - Wholesale

Investment objective

To provide high returns over the long term while accepting high levels of volatility. To provide returns above the Fund's performance benchmark (after costs and before tax).

Minimum suggested time frame

5 to 7 years

Type of fund

The Fund invests primarily in a portfolio of shares listed on the Australian Securities Exchange.

Performance benchmark

S&P/ASX 200 Accumulation Index

Inception date

10 May 2000

Fund size

\$553.15 million

Management costs

0.714%

Distribution frequency

Half Yearly

Buy/sell spread

+0.25/-0.25

Investment approach

The Fund targets companies that: generate a strong free cash flow, manage capital effectively, have sustainable long term growth prospects, and demonstrate strong management capability and vision.

Asset allocation

Performance – periods to 30 June 2010

%	1 mth	3 mth	1 yr	3 yr	5 yr	incept
Before tax and after fees	-2.81	-11.56	13.71	-5.67	5.75	8.13
Before tax and fees	-2.76	-11.40	14.49	-4.95	6.52	9.09
Benchmark	-2.59	-11.14	13.15	-7.84	4.52	7.81
Growth	-3.48	-12.17	10.52	-13.54	-5.80	-0.32
Income	0.67	0.61	3.19	7.87	11.55	8.45

*Performance more than 1 year is annualised

Returns are calculated using the unit price which uses the net asset values for the relevant month end. This price may differ from the actual unit price for an investor applying for or redeeming an investment. Actual unit prices will be confirmed following any transaction by an investor. Returns quoted are before tax, after Class 'O' fees and costs, assume all distributions are reinvested and are annualised for periods greater than one year.

Performance and Activity

The AMP Capital Equity Fund - Wholesale (the Fund) returned -11.56% (Before tax and after fees) in the Jun quarter, compared to the benchmark return of -11.14%

Contributing to the Fund's performance in June were overweight positions in Telstra, whose shares hit a four-month high at the end of June after the announcement of the company's \$11 billion broadband deal, Macquarie Atlas Roads, Intoll, Crown and Coca-Cola Amatil; and underweight positions in Brambles, whose share price slumped as investors were nervous about the upcoming earnings report, QBE Insurance, Downer EDI and Westfield. Detracting from the Fund's performance over the period were overweight positions in Macquarie Group, Boral, which announced it would reduce its portfolio after identifying core areas of investment, News Corp, Qantas, and ASX; and underweight positions in Newcrest Mining, and Lihir Gold, which announced it will delist from the Toronto Stock Exchange due to low take-up of its shares in Canada.

Market commentary

Australian shares experienced a sharp correction in the June quarter, following the lead from weak global share markets. The Australian market also faced an additional headwind following the Federal Government's announcement of the proposed Resource Super Profits Tax. The S&P/ASX 200 Accumulation Index fell 11.1% for the quarter. The worst performing sectors in the June quarter were Industrials (-19.1%), Financials ex Property (-15.2%) and Consumer Discretionary (-12.3%). Ausenco, Virgin Blue Holdings and Emeco Holdings detracted from the performance of the Industrials sector; while Tower Australia, Westpac and Perpetual were the worst performing stocks in the Financials ex Property sector. The best performing sectors over the quarter were Telecommunication Services (7.3%) which posted the only positive sector return, Property (-1.3%) and Consumer Staples (-4.5%). Telstra was the only positive contributor to the Telecommunications sector, whereas Commonwealth Property Office Trust, CFS Retail Property Trust and Abacus property Group were the best performing stocks in the Property sector.

Outlook

Concerns about a double dip recession continue to see equities come under selling pressure, however the risk of this is low. Share valuations have improved significantly but shares may continue to see weakness for a few months yet and bond yields may move lower in the near term. While it is proving that 2010 will be a more volatile ride than 2009, shares should see gains into year-end as the economic outlook becomes clearer.
