

AMP All Growth Fund

The AMP All Growth Fund aims to provide high returns over the long term through a portfolio investing mostly in Australian and international shares.

AMP Capital's innovative approach to diversification

AMP Capital's approach creates diversified portfolios by combining varied sources of performance – the key to good long term investing. AMP Capital believes the three key sources are:

- Active management of portfolios' allocations to different markets and sectors to suit changing short, medium and long term investment environments and conditions.
- Investment techniques that have the ability to consistently perform over long periods, such as active stock selection for Australian shares.
- Addition of new opportunities for investment (such as global listed property securities and emerging markets) which have the potential to add substantial and consistent value over the medium to long term.

Active asset allocation

The AMP All Growth Fund's strategic and tactical asset allocation are actively managed by Dr Shane Oliver and his team to suit changing investment environments and conditions.

Blend of styles for Australian shares

The Australian share portfolio is managed using a tailored blend of investment styles; Capital, Value Plus, Sustainable, Active Quant and Enhanced Index, designed to maximise the risk-adjusted return.

Blend of styles for international shares

International shares are managed by using a blend of investment styles and leading specialist managers from around the world.
